**go**>*flatpacks*

Tools Required:

Cordless Drill

Step 1:

Collect all of the required parts for your goFlatpacks product. You will need:

1. First Door Panel
2. Second Door Panel
3. Installed Hinge Plates
4. Hinge Plates
5. Corner Cabinet Bi-Fold Hinge
6. 170°/180° Hinge

Step 2:

Your **First Door Panel** will contain cut-outs for your two types of hinges.

Please note, the cut-outs which go all the way to the edges of the panels are for the **Corner Cabinet Bi-Fold Hinges**.
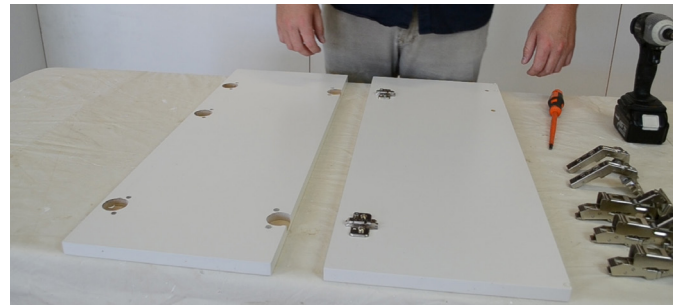

Step 3:

Place your **170°** or **180° Hinge** into the cut-outs provided.

Step 4:

Press firmly into place and flip down the boss cover cap to secure in place.

Repeat the process with the remaining hinges of this type.

go>flatpacks

Step 5:

Next you will be installing the **Corner Cabinet Bi-Fold Hinges**.

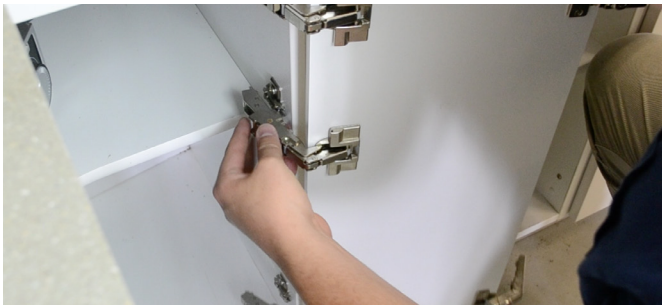

Step 6:

Place into the cut-out provided, press into place and then secure by tightening the screws.

Be careful not to over-tighten. Repeat with the remaining bi-fold hinges.

Step 7:

Take the door that has the hinges affixed and attach to the **Hinge Plates** on the inside of your cabinet carcase. Simply place the hinges in line with the **Hinge Plate** then press to clip on.

Step 8:

Open and close the door to ensure the hinges are working correctly.

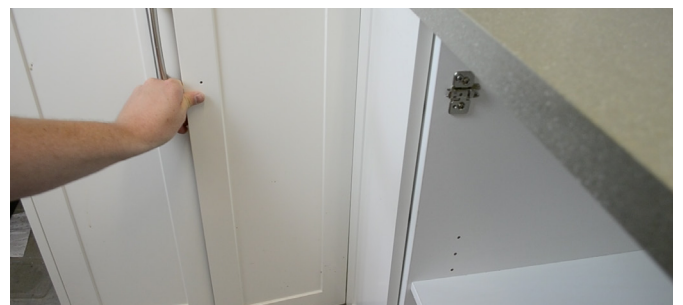

Step 9:

Next, clip the **Hinge Plates** on the **Second Door Panel** onto the **Bi-Fold Hinges** installed on the **First Door Panel**. Simply place in line and clip into position.

Step 10:

Open and close your **Bi-Fold Door** a couple of times to check that it is working correctly.
