go>*flatpacks*

Tools Required:

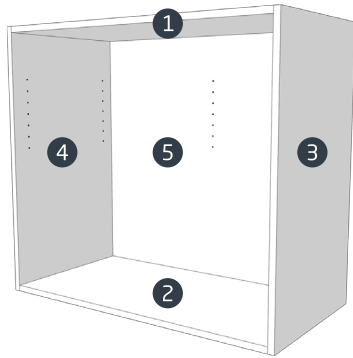

Glue Bottle

Cordless Drill

Step 1:

Collect all of the required parts for your goFlatpacks product. You will need:

1. Top Panel
2. Bottom Panel
3. Right Side Panel
4. Left Side Panel
5. Back Panel
6. Wood Screws

Step 2:

The first part you will be working with is the **Top Panel** and one **Side Panel**.
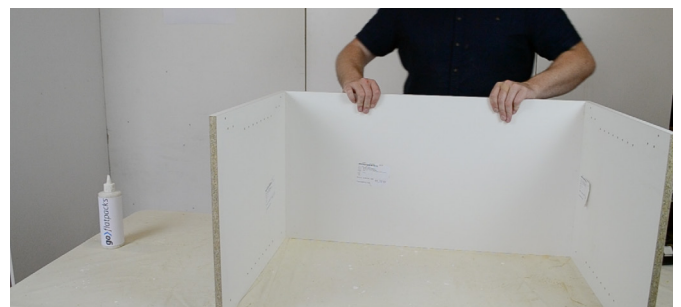

Glue along the edge of your **Top Panel**

Step 3:

Lift your **Side** and **Top Panel** up to meet together, then screw the two panels using the **Wood Screws**.

Step 4:

Repeat the process with your remaining **Side Panel**.

Step 5:

On your **Bottom Panel**, glue along the edges, put into position and ensure edges are flush before affixing the panel to the **Side Panels** with **Wood Screws**.

Step 6:

Flip your cabinet carcase so that the edge stripping is facing down, and the bare back of the cabinet carcase is facing upwards. Place some glue along the edges.

Step 7:

Your **Back Panel** may have a small marking like this towards one edge. This indicates the edge that is to line up with your **Bottom Panel**.

Step 8:

Place your **Back Panel** on your cabinet carcase, ensuring it is square and then proceed to affix with screws. Screwing down one edge, followed by the adjacent edge to square the cabinet.

Step 9:

Congratulations! You have finished assembling your goFlatpacks Upper Cabinet.
